

SADHU MANOJ

AI/ML Engineer

Bengaluru, India | +91 93924 49081 | manojchowdary798@gmail.com | sadhumanoj.github.io | linkedin.com/in/sadhu-manoj-67ab46256

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building production machine learning pipelines, Retrieval-Augmented Generation (RAG) chatbots, translation models, and workflow automation systems. Skilled in Python, SQL, PyTorch, and Scikit-learn, with practical expertise in LangChain, vector databases, LLM integration (Ollama, Claude AI, Hugging Face, ChatGPT), and Streamlit application development. Experienced in automating conversational and voice assistant workflows using n8n, and translating large datasets into actionable business insights through Power BI and Tableau. Passionate about applying AI to solve real-world business problems.

CORE SKILLS

Programming & Data: Python (Pandas, NumPy), SQL, Git/GitHub

Machine Learning & AI: Scikit-learn, PyTorch, Hugging Face, LLM Integration (Ollama, Claude AI, ChatGPT), Prompt Engineering, RAG Pipelines, LangChain, Vector Databases (FAISS/Chroma), Predictive Modeling, NLP, Translation Models

Automation & Application Development: n8n Workflow Automation, Chatbot & Voice Assistant Development, Streamlit, FastAPI

BI & Visualization: Power BI, Tableau, Microsoft Excel, DAX

Databases: MySQL, MS SQL Server

Cloud & Networking: AWS (EC2, S3, VPC, IAM, Auto Scaling, Load Balancing), CCNA — Introduction to Networks (Cisco)

PROFESSIONAL EXPERIENCE

AI/ML Engineer — Caledon Technologies India Pvt. Ltd.

Sep 2025 – Present

Bengaluru, Karnataka

- Developed and deployed conversational chatbot platforms (chat boards) integrating large language models to automate customer interactions and support workflows.
- Built translation models to enable multilingual communication across customer-facing chatbot and support applications.
- Designed and implemented Retrieval-Augmented Generation (RAG) pipelines using LangChain and vector databases, enabling plain-English querying of CSV, Excel, and text-based business data.
- Built Streamlit-based front-end applications for interactive data analytics, allowing business users to query and visualize datasets using natural language.
- Built and deployed Scikit-learn and PyTorch machine learning models for car rental price prediction, performing forecasting and trend assumptions that improved accuracy over baseline heuristics.
- Developed voice assistants and chat assistants using n8n workflow automation, streamlining customer support and internal business processes.
- Automated email response and conversational workflows using n8n, significantly reducing manual processing effort.
- Designed AI-driven analytical dashboards integrated with Claude AI APIs, enabling real-time, client-facing data exploration.
- Delivered interactive historical data dashboards in Power BI and Tableau to support business decision-making.

Data Science Intern — Grow-Tech (Dr. Reddy's Foundation)

Jun 2025 – Sep 2025

Bengaluru, Karnataka

- Cleaned and preprocessed multi-source datasets using Python (Pandas, NumPy) to improve downstream data quality.
- Managed SQL databases (MySQL, MS SQL Server) for structured data storage, queries, and reporting.
- Built Power BI, Tableau, and Excel dashboards using DAX and CALCULATE functions to visualize business KPIs.
- Gained practical exposure to core AWS services including compute, storage, and networking fundamentals.

PROJECTS

Enterprise RAG Chatbot with LangChain and Vector Databases

- Architected a Retrieval-Augmented Generation (RAG) chatbot using LangChain, vector databases, and LLMs to enable natural language querying of business documents and datasets.
- Built a Streamlit front-end for interactive data analytics, allowing non-technical users to query data conversationally.

Multilingual Translation Model Integration

- Developed and integrated translation models to support multilingual customer interactions across chatbot platforms.

Voice and Chat Assistant Automation using n8n

- Designed voice assistant and chat assistant workflows using n8n, automating customer support and repetitive business processes.

Car Rental Business Insights — End-to-End AI/ML Solution

- Engineered machine learning pipelines for future price prediction using Python, Scikit-learn, and PyTorch.
- Deployed RAG chatbots with n8n and Hugging Face to support plain-language data queries over business documents.
- Built Power BI and Tableau dashboards for historical insight and executive reporting.

EDUCATION

B.Tech — Electronics & Communication Engineering

Nov 2020 – May 2024

Sri Venkateswara Engineering College, JNTUA · Tirupati, AP | CGPA 8.28 / 10.0

Intermediate — MPC

Jun 2018 – Aug 2020

Sri Chaitanya Junior College · Tirupati, AP | CGPA 10.0 / 10.0

10th Class (SSC)

2017 – 2018

Amaravathi EM School · Rajampet, AP | CGPA 9.5 / 10.0

CERTIFICATIONS

- CCNAv7 — Introduction to Networks, Cisco Networking Academy
- Data Analytics Job Simulation, Deloitte
- Python for Data Analysis, SimpliLearn / SkillUP
- SQL and Relational Databases, Cognitive Class (IBM Collaboration)
